ALINA DEEVA
QA/AQA ENGINEER

Employment: full
Remote work, relocate is possible
Location: Herceg Novi, Montenegro

QA engineer with experience in manual testing - UI, API, creation of check lists, test cases and other test documentation. Also I'm interested in auto test developing and have several projects on Java+JUnit or TestNG for UI-tests and Java+RestAssured for API. With Java I'm learning JS now, improving my English and have a great plan to become an awesome QA specialist.
